

# Jair Alexis Mera Toasa

[hello@devjaes.dev](mailto:hello@devjaes.dev) | [linkedin.com/in/jair-mera-dev](https://linkedin.com/in/jair-mera-dev) | [devjaes.dev](https://devjaes.dev) | [AWS SAA \(Verify\)](#)

## Professional Summary

Full Stack Engineer focused on **Node.js (NestJS/Express)**, **Ruby on Rails**, and **React/Next.js**, building scalable APIs, event-driven systems, and SaaS web apps. **AWS Certified Solutions Architect – Associate** with hands-on AWS experience (Lambda, S3, SQS/SNS, DynamoDB) and event-driven async processing via BullMQ queues. Currently at **Senirop**, working on **TAPinto.net** (high-traffic US news platform: background jobs, cache, performance). Strong testing discipline (**Jest, Playwright**) and AI-accelerated workflows (**Cursor, Claude Code, GitHub Copilot**).

## Experience

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                        |

## Technical Skills

**Backend & Cloud**: Node.js, NestJS, Express, Ruby on Rails, REST APIs, Microservices, Event-driven (BullMQ, SQS/SNS), **AWS Lambda**, **Serverless Framework**, DynamoDB, S3, EC2, CloudFormation/CDK  
**Core Languages**: TypeScript, JavaScript, SQL, PostgreSQL, MySQL  
**Frontend**: React 18/19, Next.js, Vite, Tailwind CSS, TanStack Query, Storybook  
**Testing & DevOps**: Jest, Playwright, Docker, Git, GitHub/Gitlab Actions (CI/CD)  
**AI Power Tools**: Cursor, Claude Code, GitHub Copilot, Windsurf  
**Spoken Languages**: **English (B2/C1)**, Spanish (Native)

## Certifications

|                                                                                                             |          |
|-------------------------------------------------------------------------------------------------------------|----------|
| <b>AWS Certified Solutions Architect – Associate</b>   <i>Amazon Web Services</i>   <i>Verify on Credly</i> | Apr 2026 |
| • Cloud architecture, security & IAM, scalability, cost optimization, AWS Well-Architected Framework.       |          |

## Honors & Awards

|                                                                                                     |          |
|-----------------------------------------------------------------------------------------------------|----------|
| <b>3rd Place - Advanced Programming Contest</b>   <i>Hatary Shunko Innovation</i>                   | Apr 2025 |
| • Developed a financial solution with AI integration in a cross-functional team of 4.               |          |
| <b>1st Place Winner - Algorithm Challenge</b>   <i>Technical University of Ambato</i>               | Apr 2023 |
| • Solved complex algorithmic challenges using TypeScript, showcasing strong analytical superpowers. |          |

## Education

|                                                                      |                                              |
